

INDEX OF SUBJECTS FOR VOLUME 25

- Abortion**
Bacillus spp., 162
 campylobacters, 7
C. trachomatis, 1
- Abortive phage-infection markers**, 221
- Achlorhydric patients, bacterial flora**, 253
- Actinomyces* spp.**
 colonisation of intra-uterine contraceptive devices, 245
- Adherence**
C. difficile to hamster gastrointestinal tract, 191
Y. pseudotuberculosis to epithelial cells, 175
- Aeromonas hydrophila***
 enterotoxin, 187
 monoclonal antibody, 187
- Agglutinogens, of *B. pertussis***, 285
- Ampicillin**
 susceptibility of Enterobacteriaceae, 95
- Anaerobes**
 detection by pre-formed enzymes, 289
 identification of gram-positive cocci, 289
 isolation from intra-uterine contraceptive devices, 245
- Anthrax**, 157
- Antibiotic resistance**
 β -lactams, and *E. cloacae*, 227
 methicillin, and *S. aureus*, 67, 261
 rifampicin, and *M. leprae*, 13
- Antibiotics and other antimicrobial substances**
 screening for anti-leprosy agents, 167
 susceptibility of Enterobacteriaceae, 95
- Antibodies**
 against cholera toxin, 139
 against *E. coli*, 33, 77, 205
 against herpes simplex virus HSV-1, 49, 59
 against human parvovirus B19, 151
 against *L. interrogans*, 269
 against methicillin-resistant *S. aureus*, 261
 against mycobacterial A60, 295
 opsonisation of *S. minnesota*, 85
 against *V. cholerae*, 129
see also Monoclonal antibodies
- Antigens**
 cholera toxin-related, in *S. typhimurium*, 139
E. coli, outer-membrane components, 33, 77, 197, 205
L. interrogans, and immune response, 269
 mycobacterial A60, 295
V. cholerae, and mucosal association, 129
- Antiserum**
B. pertussis, 285
C. diphtheriae toxin 279
E. coli, 33, 77, 205
 group-B streptococci, 147
 neuraminidase activity of *V. cholerae*, 123
- Antitoxin, *C. diphtheriae***, 279
- ATP bioluminescence, and Enterobacteriaceae**, 95
- Bacillus***
B. anthracis, pathogenicity and prevalence, 157
B. cereus, pathogenicity and prevalence, 158, 163
B. cereus, toxins, 161
B. licheniformis, pathogenicity and prevalence, 161, 162, 163
B. piliformis, 163
B. subtilis, classification and pathogenicity, 158, 162, 163
 identification, 163
 species of medical and veterinary importance, 157
- Bacteraemia, *B. cereus***, 159
- Bioluminescence**
 ATP method and Enterobacteriaceae, 95
- Blastomyces dermatitidis***
 enhanced killing by oxidative mechanisms, 115
 fungicidal activity of polymorphonuclear leukocytes, 115
- BOOKS RECEIVED**
- Bacterial meningitis** (edited by J. D. Williams and J. Burnie), 307
- The dermatology of bacterial infections** (G. H. Findley), 306
- Hepadna viruses** (edited by W. Robinson, K. Koike and H. Will), 306
- Infection in cardiothoracic intensive care** (R. Freeman and Frances K. Gould), 307
- Bordetella pertussis***
 effects on plasma insulin, 183
 immuno-electronmicroscopy of fimbriae-like structures, 285
- Campylobacters**
 effects on fetal development, 7
- Capsules**
E. coli, antibody response, 77
 immuno-electronmicroscopy of group-B streptococci, 147
- Central nervous system infections**
B. cereus, 159
- Chemiluminescence**
 opsonised *S. minnesota*, 85
- Chlamydia trachomatis***
 placental colonisation of mice, 1
- Cholera toxin-related antigen of *S. typhimurium***, 139
- Chromatography**
 outer-membrane proteins of *V. cholerae*, 129
- Clostridium difficile***
 mucosal association, 191
 toxin production, 191
- Colicin**
 Col I plasmids in *Salmonella* spp., 221
- Copper intra-uterine contraceptive devices**
 genital tract flora, 245
- Corynebacterium diphtheriae***
 assays for antitoxin in human sera, 279
- Crohn's disease patients**, 295
- Cytotoxins**
 Vero cytotoxin in *E. coli*, 237
- DNA probes, for Vero cytotoxins**, 237

- Electronmicroscopy**
 capsular strains of group-B streptococci, 147
 fimbriae-like structures on *B. pertussis*, 285
 immuno-electronmicroscopy, 147, 285
 proliferation of salmonella in murine spleen, 41
- ELISA**
 antibody against mycobacterial A60, 295
C. diphtheriae antitoxin assay, 279
 monoclonal antibodies against *A. hydrophila*, 187
 sera from Crohn's disease patients, 295
S. typhimurium antigen activity, 139
- Endocarditis, *B. cereus***, 159
- Enzymes, pre-formed**
 identification of gram-positive cocci, 289
- Enterobacteriaceae**
 antibiotic susceptibility, 95
 ATP bioluminescence tests, 95
- Enterobacter cloacae***
 antibiotic resistance, 227
 chromosomal β -lactamase expression, 227
- Enterotoxins**
A. hydrophila, 187
B. cereus, 161
S. typhimurium, 139
- Escherichia coli***
 antibiotic susceptibility, 95
 ATP bioluminescence tests, 95
 capsulate strains, 77
 DNA probes, 237
 haemolytic uraemic syndrome, 237
 killing by neutrophils, 101
 lipopolysaccharide-induced resistance to infection, 33, 77, 197, 205
 opsonisation and phagocytosis, 205
 peritonitis in mouse models, 33, 77, 197, 205
 role of specific and non-specific immunity, 33, 77, 197, 205
 Vero cytotoxins, 237
- Eye infections, *B. cereus***, 158
- Faecal flora**
E. coli in haemolytic uraemic syndrome, 237
- Fetal development**
C. trachomatis in mouse model, 1
 campylobacters in mouse model, 7
- Fimbriae-like structures on *B. pertussis***, 285
- Fingerprinting**
 methicillin-resistant *S. aureus*, 261
- Flagella-associated antigens of *V. cholerae***, 129
- Fluorescent antibody technique**
 antigenic properties of *S. typhimurium*, 139
- Food poisoning**
B. cereus, 160, 163
B. licheniformis, 161
B. subtilis, 162
- Fungicidal activity**
 polymorphonuclear leukocytes, 115
- Gastric cancer and achlorhydric patients**, 253
- Gastric juice**
 flora of achlorhydric patients, 253
- Genital tract**
 flora, effects of copper intra-uterine contraceptive devices, 245
 infection, mouse model for *C. trachomatis*, 1
- Gentamicin**
 susceptibility of Enterobacteriaceae, 95
- Glycolipid, *S. minnesota***, 85
- Goblet cell assay**
V. cholerae neuraminidase activity, 123
- Gold-labelling, *B. pertussis***, 285
- Guinea pig neutralisation test**
C. diphtheriae antitoxin, 279
- Haemagglutination, *Y. pseudotuberculosis***, 175
- Haemolysins**
A. hydrophila, 187
 production and properties in *Proteaeae*, 17
 virulence factors, 17
- Haemolytic uraemic syndrome (HUS)**
E. coli, 237
- Haemophili, in achlorhydric stomach**, 253
- Hamster model**
 mucosal association by *C. difficile*, 191
- Herpes simplex virus HSV-1, polypeptides**
 immunoblotting procedure, 49
 immunoglobulin response, 49, 59
 primary and secondary experimental infection, 59
- Human parvovirus B19**
 prevalence of antibody in population, 151
- Hybridisation of DNA**
 detection of Vero cytotoxins, 237
- Hyperinsulinaemia in pertussis patients**, 183
- Hypogammaglobulinaemia patients**, 253
- Hypoglycaemia in pertussis patients**, 183
- Hypoxanthine incorporation by *M. leprae***, 167
- Imipenem, resistance of *E. cloacae***, 227
- Immune response**
E. coli peritonitis in mouse models, 33, 77, 197, 205
 fungicidal activity of activated polymorphonuclear leukocytes, 115
 herpes simplex virus HSV-1, 49, 59
 in leptospirosis, 269
- Immunisation**
 mice against *E. coli*, 33, 77, 197, 205
 mice against herpes simplex virus, 59
 rats against *V. cholerae*, 129
- Immunoblotting**
 cholera toxin-related antigen of *S. typhimurium*, 139
 immunoglobulin response to herpes simplex virus HSV-1, 49, 59
 methicillin-resistant *S. aureus*, 261
- Immuno-electronmicroscopy**
 capsular group-B streptococci, 147
 fimbriae-like structures on *B. pertussis*, 285
- Immunoglobulins**
 IgA protease production by *Proteaeae*, 27
 IgG, anti-B19 (human parvovirus B19), 151
 IgG, antibodies to *C. diphtheriae*, 279
 IgG, anti-neuraminidase activity, 123
 immunoblotting procedure, 49
 polyspecific response to HSV-1 viral proteins, 49, 59

- Immunoprecipitation assay
herpes simplex virus HSV-1, 49
- Immunosuppression model
E. coli peritonitis in mice, 33
- Insulin levels
effects of pertussis toxin, 183
- Intra-uterine contraceptive device
effects on genital tract flora, 245
- Klebsiella* spp.
antibiotic susceptibility, 95
ATP bioluminescence tests, 95
- β -Lactam antibiotics
resistance of *E. cloacae*, 227
- β -Lactamase
chromosomal expression by *E. cloacae*, 227
- Leptospira interrogans*
antigens, in immune response, 269
serodiagnosis, 269
- Leptospirosis, 269
- Lipopolysaccharide (LPS)
E. coli, role in immune response, 33, 77, 197, 205
E. coli, toxicity, 197
L. interrogans, and immune response, 269
S. minnesota, and monoclonal antibodies, 85
V. cholerae, and mucosal association, 129
- Macrophages
role in *E. coli* peritonitis, 33, 205
role in murine salmonellosis, 41
- Mastitis, bovine, and *Bacillus* spp., 163
- Methicillin resistance of *S. aureus*, 67, 261
- Methoxyphenol-neuraminidase assay
V. cholerae neuraminidase activity, 123
- Monoclonal antibody
against *A. hydrophila* haemolysin, 187
against *B. pertussis*, 285
against *S. minnesota*, 85
- Monophosphoryl lipid A, *E. coli*, 197
- Morganella* spp.
production and properties of haemolysins, 17
virulence factors, 17, 27
- Mouse models
campylobacters and impaired fetal development, 7
immune response to herpes simplex viral polypeptides, 59
immunisation against *E. coli* peritonitis, 33, 77, 197, 205
placental colonisation by *C. trachomatis*, 1
salmonella proliferation in spleen, 41
virulence of *M. leprae*, 13
- Mucinase activity of *V. cholerae*, 123
- Mucosal
association by *C. difficile*, 191
colonisation by *V. cholerae*, 129
- Mycobacteria
antibodies against mycobacterial A60 in Crohn's disease patients, 295
M. haemophilum infection in renal transplant patients, 299
- M. leprae*, hypoxanthine incorporation, 167
M. leprae, screening for anti-leprosy agents, 167
M. leprae, virulence and rifampicin resistance, 13
- Neuraminidase
V. cholerae, neutralisation, 123
- Neutralisation test, *C. diphtheriae* antitoxin
guinea pig, 279
tissue culture, 279
- Neutrophils
effects of pH on antibacterial activity, 101
phagosome model, 101
see also Polymorphonuclear leukocytes
- Nitrate- and nitrite-reducing bacteria in achlorhydric stomach, 253
- Opsonisation
E. coli, 205
S. minnesota, 85
- Outer-membrane (OM)
E. coli, immune response, 33, 77, 197, 205
V. cholerae, and mucosal association, 129
- Oxidative metabolism
polymorphonuclear leukocytes, fungicidal activity, 115
- Panophthalmitis, and *B. cereus*, 158
- Pelvic inflammatory disease (PID)
intra-uterine contraceptive devices, 245
- Peritonitis
E. coli in mouse models, 33, 77, 197, 205
- Pertussis toxin
effects on plasma insulin levels, 183
- pH
antibacterial activity of neutrophils, 101
- Phages
abortive infection markers in *Salmonella* spp., 221
typing of *S. aureus*, 67
- Phagocytosis
E. coli by macrophages, 33, 205
opsonised *S. minnesota*, 85
S. typhimurium in murine spleen, 41
- Phagosome model, 101
- Piperacillin
susceptibility of Enterobacteriaceae, 95
- Plasmids
abortive phage-infection markers, 221
profiles, typing *P. aeruginosa*, 109
S. agona, 221
S. typhimurium, 221
UV-protection markers, 221
virulence of *Y. pseudotuberculosis*, 175
- Polymorphonuclear leukocytes (polymorphs)
effects of pH on antibacterial activity, 101
oxidative mechanisms and fungicidal activity, 115
role in murine salmonellosis, 41
see also Neutrophils
- Polypeptides
immunogenic, herpes simplex virus, 49, 59
- Polysaccharide
capsular, in *E. coli*, 77
group-B streptococci, 147

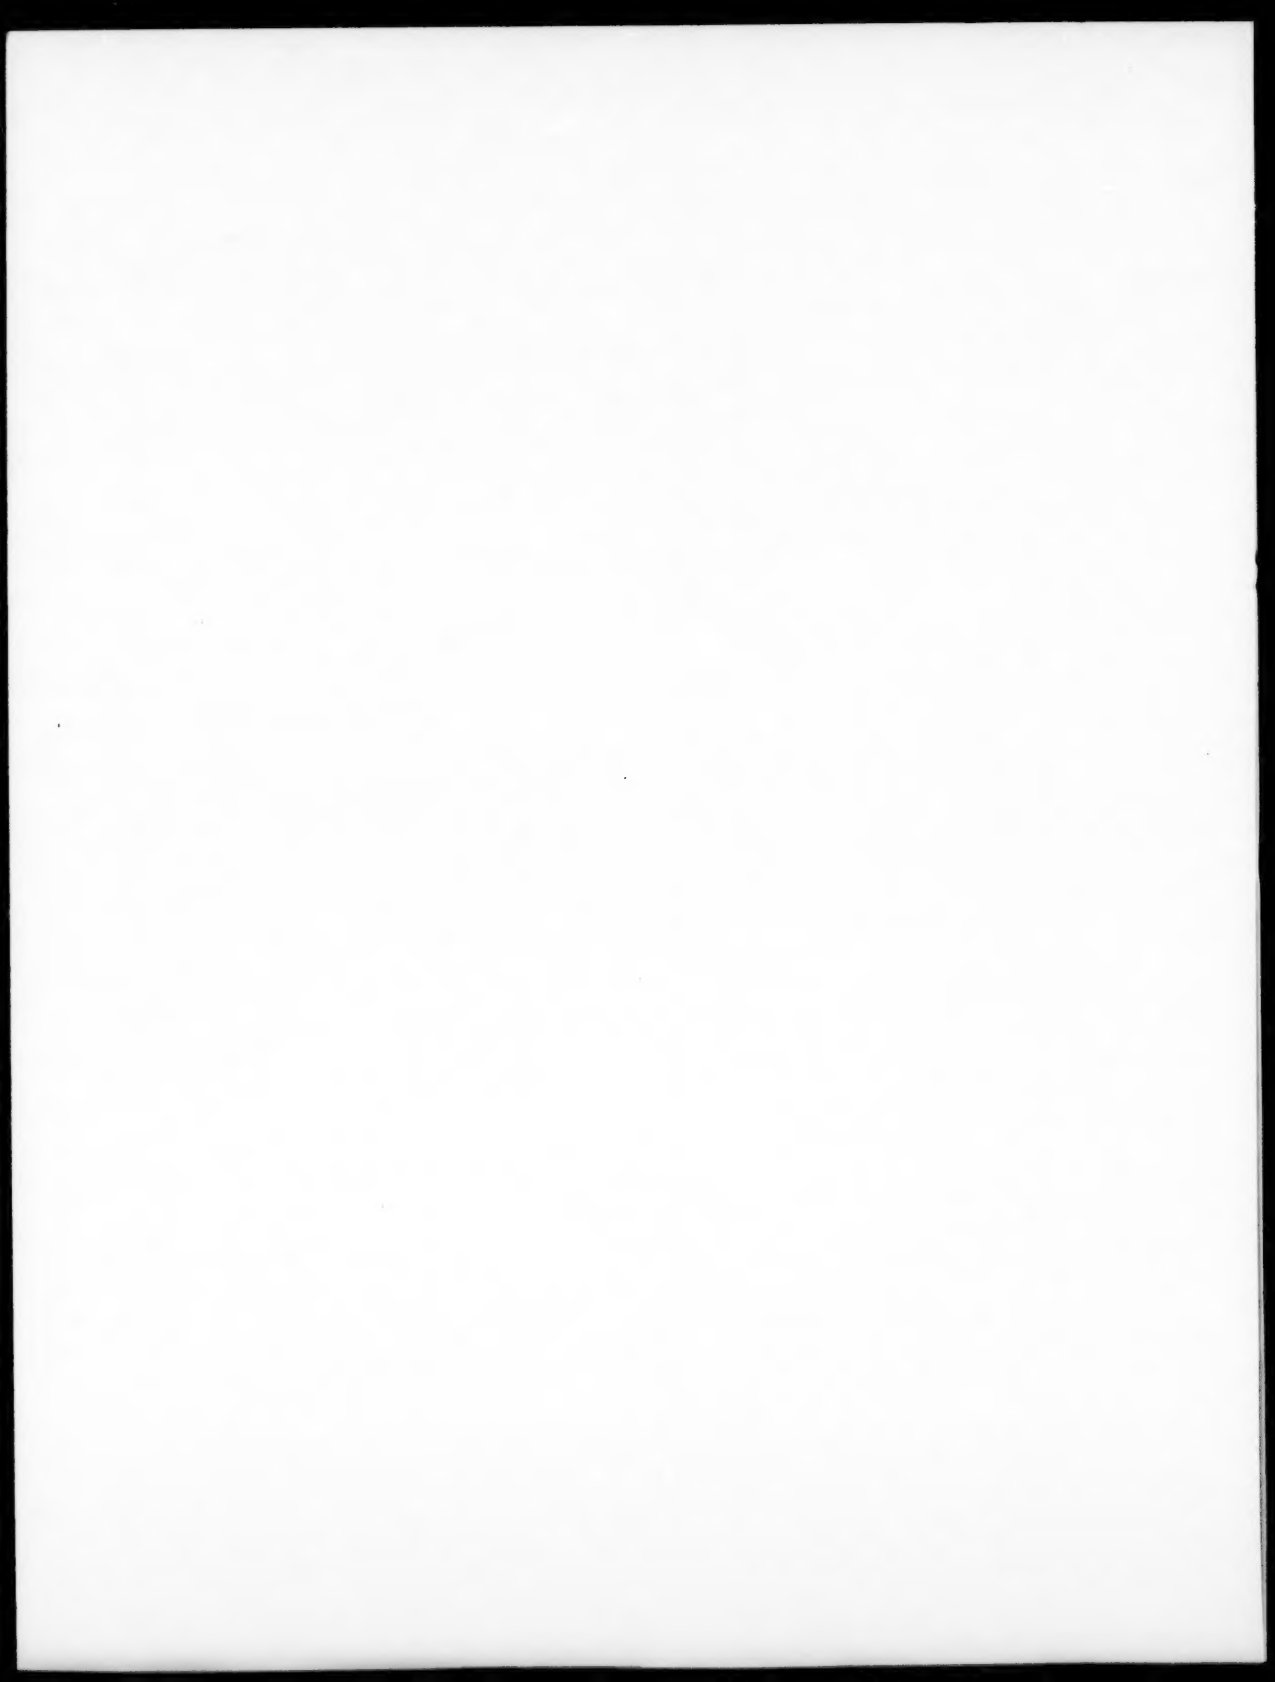

- Pregnancy**
 placental colonisation of mice by *C. trachomatis*, 1
 effects of campylobacter infections, 7
- Protease production by Proteeae**, 27
- Proteeae**
 IgA protease production, 27
 production and properties of haemolysins, 17
 in urinary tract infections, 17, 27
 virulence factors, 17
- Proteins**
E. coli, outer-membrane components, 77
 herpes simplex virus, immunogenic, 49, 59
V. cholerae, outer-membrane antigens, 129
- Proteus**
 IgA protease production, 27
P. mirabilis, antibiotic susceptibility, 95
P. mirabilis, ATP bioluminescence, 95
 production and properties of haemolysins, 17
 in urinary tract infections, 17, 27
 virulence factors, 17, 27
- Providencia spp.**, virulence factors, 17, 27
- Pseudomonas**
 identification by enzyme systems, 289
P. aeruginosa, plasmid profiles, 109
P. aeruginosa, serotyping and pyocin typing, 109
- Pyocin typing, P. aeruginosa**, 109
- Radioimmunoassay (RIA)**
 antibody to human parvovirus B19
- Renal transplant patients**
M. haemophilum infection, 299
- Respiratory tract infections, B. cereus**, 159
- Reticuloendothelial system (RES)**
 role in murine salmonellosis, 41
- Rifampicin resistance, and M. leprae**, 13
- Salmonellae**
S. agona, abortive phage-infection markers, 221
S. agona, plasmids, 221
S. agona, UV-protection markers, 221
S. minnesota, opsonisation, 85
S. typhimurium, abortive phage-infection markers, 221
S. typhimurium, cholera-related antigen, 139
S. typhimurium, plasmids, 221
S. typhimurium, proliferation in murine spleen, 41
S. typhimurium, UV-protection markers, 221
- SDS-PAGE**
S. typhimurium antigen, 139
- Septicaemia**
B. cereus, 159
E. coli, 33, 77, 197, 205
- Serology**
 assays of *C. diphtheriae* antitoxin, 279
 immune response to *L. interrogans*, 269
- Serotyping, P. aeruginosa**, 109
- Serratia spp.**
 antibiotic susceptibility, 95
 ATP bioluminescence tests, 95
- Serum**
 against *L. interrogans* antigens, 269
 inhibition of *T. glabrata*, 213
see also Opsonisation
- Sialic acid**
 in group-B streptococci, 147
- Staphylococcus aureus**
 fingerprinting by immunoblotting, 261
 killing by neutrophils, 101
 methicillin resistance, 67, 261
 phage-typing, 67
- Streptococci**
 immuno-electronmicroscopy of group-B serotypes, 147
- Thiobarbituric acid assay**
V. cholerae neuraminidase activity, 123
- Tissue culture**
 neutralisation test, *C. diphtheriae* antitoxin, 279
- Torulopsis glabrata**
 inhibition by human serum, 213
- Toxins**
A. hydrophila, 187
B. cereus, 161
C. difficile, 191
 cholera toxin-related antigen of *S. typhimurium*, 139
 pertussis, 183
see also Cytotoxins; Enterotoxins
- Tyzzler's disease**, 163
- Urinary tract infections**
 virulence factors of *Proteeae*, 17, 27
- UV-protection markers in Salmonella spp.**, 221
- Veillonellae, and achlorhydric stomach**, 253
- Vero cytotoxin production, E. coli**, 237
- Vibrio cholerae**
 neutralisation of neuraminidase activity, 123
 resistance to mucosal association, 129
 role of surface antigens in immunity, 129
- Virulence factors**
C. difficile, 191
M. leprae, 13
Proteeae, 17, 27
Y. pseudotuberculosis, 175
- Western blotting**, 49, 59
- Whooping cough, and plasma insulin**, 183
- Wool-sorter's disease**, 158
- Wound infections, B. cereus**, 159
- Yeasts**
B. dermatitidis, 115
 inhibition by human serum, 213
T. glabrata, 213
- Yersinia pseudotuberculosis**
 adherence to epithelial cells, 175
 haemagglutinating activity, 175
 virulence plasmids, 175

CONTENTS

Volume 25. No. 1—January

- Failure of *Chlamydia trachomatis* to pass transplacentally to fetuses of TO mice infected during pregnancy** 1
Tuffrey, Maureen, Falder, P., Gale, J. and Taylor-Robinson, D.
- Campylobacters and impaired fetal development in mice** 7
O'Sullivan, A. M., Dore, C. J. and Coid, C. R.
- Rifampicin-resistant strains of *Mycobacterium leprae* may have reduced virulence** 13
McDermott-Lancaster, R. Denise and Hilson, G. R. F.
- Production and properties of haemolysins from clinical isolates of the *Proteaeae*** 17
Senior, B. W. and Hughes, C.
- A survey of IgA protease production among clinical isolates of *Proteaeae*** 27
Senior, B. W. Albrechtsen, Merete and Kerr, M. A.
- Experimental *Escherichia coli* peritonitis in immunosuppressed mice: the role of specific and non-specific immunity** 33
Vuopio-Varkila, J.
- Electronmicroscopic studies on the location of salmonella proliferation in the murine spleen** 41
Wang, Xiu-Mei, Lin, F. R., Hsu, H. S., Mumaw, V. R. and Nakoneczna, Irene
- The polyspecific immunoglobulin response to HSV-1 viral proteins: determination of immunogenic proteins and relative antibody titres to individual polypeptides by immunoblotting** 49
McKendall, R. R., Pettit, M. and Woo, W.
- The immunoglobulin response to individual HSV-1 viral polypeptides: kinetics of the response during primary and secondary experimental infection with herpes simplex virus** 59
McKendall, R. R., Pettit, M. and Woo, W.
- Supplementary phages for the investigation of strains of methicillin-resistant *Staphylococcus aureus*** 67
Richardson, Judith F., Chittasobhon, Nuanchan and Marples, R. R.
- Obituary Notice** 75

Volume 25. No. 2—February

- Protective capacity of antibodies to outer-membrane components of *Escherichia coli* in a systemic mouse peritonitis model** 77
Vuopio-Varkila J., Karvonen Marjatta and Saxen, H.
- Comparison of the opsonic activity of polyclonal and monoclonal antibodies raised against *Salmonella minnesota* strain R595** 85
Mehta, N. D., Wilson, B. M., Rapson, N. T. and Easmon, C. S. F.

Rapid antibiotic susceptibility tests on Enterobacteriaceae by ATP bioluminescence	95
<i>Wheat, P. F., Hastings, J. G. M. and Spencer, R. C.</i>	
Effects of pH on killing of <i>Staphylococcus aureus</i> and <i>Escherichia coli</i> by constituents of the neutrophil phagolysosome	101
<i>Styrt, Barbara and Klempner, M. S.</i>	
Plasmid profiles compared with serotyping and pyocin typing for epidemiological surveillance of <i>Pseudomonas aeruginosa</i>	109
<i>Poh, C. L., Yap, E. H., Tay, L. and Bergan, T.</i>	
Enhanced oxidative mechanisms in immunologically activated versus elicited polymorphonuclear neutrophils: correlations with fungicidal activity	115
<i>Morrison, Christine J., Isenberg, R. A. and Stevens, D. A.</i>	
Studies on the <i>Vibrio cholerae</i> mucinase complex. III. Neutralisation of the neuraminidase activity by specific anti-neuraminidase IgG	123
<i>Stewart-Tull, D. E. S. and Ollar, R. A.</i>	
Antigens involved in resistance to mucosal association by <i>Vibrio cholerae</i>	129
<i>Narendranathan, R., Lutze, L. H., Jackson, G. D. F. and Cooper, G. N.</i>	
Expression of an antigen in strains of <i>Salmonella typhimurium</i> which reacts with antibodies to cholera toxin	139
<i>Clark, G. J., Qi, G.-M., Wallis, T. S., Starkey, W. G., Collins, J., Spencer, A. J., Haddon, S. J., Osborne, M. P., Worton, K. J., Candy, D. C. A. and Stephen, J.</i>	
Short Articles	
Immuno-electronmicroscopic demonstration of capsules on group-B streptococci of new serotypes and type candidates	147
<i>Rýc, M., Jelinková Jarmila, Motlová Jitka and Wagner, M.</i>	
The prevalence of antibody to human parvovirus B19 in England and Wales	151
<i>Cohen, B. J. and Buckley, Marie M.</i>	
Announcements	155

Volume 25. No. 3—March

REVIEW

<i>Bacillus</i> species of medical and veterinary importance	157
<i>Logan, N. A.</i>	
Measurement of hypoxanthine incorporation in purified suspensions of <i>Mycobacterium leprae</i>: a suitable method to screen for anti-leprosy agents <i>in vitro</i>	167
<i>Wheeler, P. R.</i>	
Lack of correlation between haemagglutination and adherence to epithelial cells in <i>Yersinia pseudotuberculosis</i>	175
<i>Kawaoka, Y., Mitani, T., Hoshina, K., Otsuki, K. and Tsubokura, M.</i>	

Slight hyperinsulinaemia but no hypoglycaemia in pertussis patients <i>Furman, B. L., Walker, E., Sidey, Fiona M. and Wardlaw, A. C.</i>	183
Production of monoclonal antibody against <i>Aeromonas hydrophila</i> haemolysin <i>Kozaki, S., Kato, Keiko, Kurokawa, Akane, Kamata, Y., Asao, T. and Sakaguchi, G.</i>	187
Mucosal association by <i>Clostridium difficile</i> in the hamster gastrointestinal tract <i>Borriello, S. P., Welch, A. R., Barclay, Fiona E. and Davies, Heather A.</i>	191
Lipopolysaccharide-induced non-specific resistance to systemic <i>Escherichia coli</i> infection in mice <i>Vuopio-Varkila, J., Nurminen, Marjatta, Pyhälä, Liisa and Mäkelä, P. H.</i>	197
Killing of <i>Escherichia coli</i> in the peritoneal cavity of convalescent mice: role of specific and non-specific immune mechanisms <i>Vuopio-Varkila, J. and Mäkelä, P. H.</i>	205
The inhibitory effect of serum on the growth of <i>Torulopsis glabrata</i> <i>Petrou, M. A. and Rogers, T. R.</i>	213
Abortive phage-infection and UV-protection markers on Col I plasmids from epidemic strains of <i>Salmonella</i> <i>Barker, Ruth M.</i>	221
Chromosomal β-lactamase expression and antibiotic resistance in <i>Enterobacter cloacae</i> <i>Yang, Youjun, Livermore, D. M. and Williams, Rosamund J.</i>	227
Announcements	235

Volume 25. No. 4—April

Verotoxin-producing strains of <i>Escherichia coli</i> from children with haemolytic uraemic syndrome and their detection by specific DNA probes <i>Scotland, S. M., Rowe, B., Smith, H. R., Willshaw, G. A. and Gross, R. J.</i>	237
The effect of a copper intra-uterine contraceptive device on the microbial ecology of the female genital tract <i>Elhag, K. M., Bahar, A. M. and Mubarak, A. A.</i>	245
Nitrate- and nitrite-reducing bacteria in the achlorhydric stomach <i>Forsythe, S. J., Dolby, J. M., Webster, A. D. B. and Cole J. A.</i>	253
Fingerprinting methicillin-resistant <i>Staphylococcus aureus</i> by the immunoblot technique <i>Lee, Woei and Burnie, J. P.</i>	261
Antigens recognised by the human immune response to infection with <i>Leptospira interrogans</i> serovar <i>hardjo</i> <i>Chapman, A. J., Adler, B. and Faine, S.</i>	269
Estimation of <i>Corynebacterium diphtheriae</i> antitoxin in human sera: a comparison of an enzyme-linked immunosorbent assay with the toxin neutralisation test <i>Melville-Smith, M. and Balfour, A.</i>	279

Immuno-electronmicroscopy of fimbriae-like structures on <i>Bordetella pertussis</i> serotype 1.3	285
<i>Fredriksen, J. H., Namork, E. and Frøholm, L. O.</i>	
Identification of gram-positive anaerobic cocci by use of systems for detecting pre-formed enzymes	289
<i>Murdoch, D. A., Mitchelmore, I. J. and Tabaqchali, S.</i>	
Short Article	
No evidence for antibodies to mycobacterial A60 antigen in Crohn's disease sera by enzyme-linked immunoabsorbent assay (ELISA)	295
<i>McFadden, J. J. and Houdayer, C.</i>	
Case Report	
Two cases of <i>Mycobacterium haemophilum</i> infection in a renal-dialysis unit	299
<i>Gouby, Anne., Branger, B., Oules, R. and Ramuz, M.</i>
